

a

b

"hi"

```
graph TD; a[a] --> hi["hi"]; b[b] --> hi;
```

The diagram consists of three rectangular boxes with black outlines. Two boxes are positioned at the top, one on the left containing the letter 'a' and one on the right containing the letter 'b'. Below these two boxes is a single, wider box containing the string '"hi"'. Two black arrows originate from the bottom center of the 'a' box and the bottom center of the 'b' box, both pointing downwards towards the top edge of the '"hi"' box.
